Windsor, ON — (226) 975-4143 — [ymmandaviya1234@gmail.com](mailto:ymandaviya1234@gmail.com) — [GitHub](#) — [LinkedIn](#)

PROFESSIONAL SUMMARY

- 2+ years of strong full-stack development experience designing, developing, testing, and maintaining scalable, customer-facing applications in agile, fast-paced high stakes production environments.
- Hands-on experience developing AI-driven and RAG-based solutions, contributing to proof-of-concept research, scalable feature implementation, automated testing, and production-ready software enhancements.
- Quick to adapt to new technologies and picking up new tech-stacks on-the-fly with a history of contributing to live projects during training phases.
- Strong communication skills with the ability to translate complex technical concepts into clear, accessible language for non-technical stakeholders, clients, and cross-functional teams.
- Reliable, proactive, results-oriented, customer-focused and attentive to details, with recognized performance in hackathons and a proven team player with solid communication skills.

WORK EXPERIENCE

Software Developer (Permanent Full-time)

Sep 2025 - Present

Fundmore.ai, Ottawa, Canada

- Developed and shipped 100+ critical software improvements, spanning new features and critical bug fixes, leveraging the MEAN stack, thus optimizing code quality and maintainability into the main development branch.
- Accelerated production readiness by delivering live bug fixes and feature enhancements across the codebase in a microservices environment, enabling smooth AWS deployments and seamless client-facing updates.
- Wrote and maintained unit, integration, and end-to-end tests to ensure 100% test coverage on all assigned features and bugs, significantly reducing QA load and post-deployment defects.
- Strengthened CI/CD infrastructure by ensuring every commit passed frontend, backend, and E2E test suites via GitHub Actions, accelerating team delivery velocity and reducing cycle times.
- Participated in multiple code reviews and agile stand-ups, contributing code improvements and providing actionable suggestions that consistently exceeded expectations.

Junior Developer (Co-op)

Jan 2025 - Aug 2025

Fundmore.ai, Ottawa, Canada

- Developed purpose-driven RAG-based AI agents by researching and delivering proof of concepts (POC's) for business-aligned use cases, demonstrating measurable impact and practical application.
- Collaborated with product and engineering teams to translate AI concepts into tangible product enhancements.
- Adapted role focus from R&D of AI-driven tools to hands-on full-stack feature development, contributing to scalable and maintainable product releases and accelerating product release cycles.

Programmer (Permanent Full-time)

Dec 2022 - Aug 2023

ACTY Systems India Pvt. Ltd., Ahmedabad, Gujarat, India

- Customized and integrated critical modules and handheld terminals for 16 global clients, enhancing a production management system used by over 1,000 users across 80+ customer accounts, driving measurable operational efficiency.
- Designed and implemented intuitive C# interfaces and SSMS integrations using DevExpress components, enabling seamless access to complex MSSQL databases and improving user experience for enterprise-scale workflows.
- Collaborated cross-functionally in an agile, iterative environment, streamlining development processes and boosting team efficiency by 32% under tight deadlines.
- Leveraged automated code platforms to optimize SDLC practices, reducing development costs by 30% while ensuring consistent, on-time delivery of high-quality software solutions.

Mobile App Developer Intern (Full-time)

Jan 2022 - Apr 2022

MeshDroid Technologies, Navsari, Gujarat, India

- Spearheaded the cross-platform migration of a healthcare application from Android to iOS using Flutter, integrating backend RESTful APIs, and successfully deploying the app to the App Store.
- Boosted mobile banking app user engagement by 35% through targeted resolution of logical business bugs and user-centric UI/UX enhancements in Flutter.
- Optimized IOT-based vending machine user experience by 20%, delivering a seamless omnichannel interface in Flutter for an enterprise-level producer and retailer.

Trainee (Part-time)

Mar 2021 - Sep 2021

Goldenmace IT Solutions, Navsari, Gujarat, India

- Conceptualized and contributed to the full lifecycle development of a QR-based dining reservation app on the Play Store, leveraging Flutter and Firebase to deliver a seamless, intuitive user experience.
- Led the creation of a reusable e-commerce UI Kit in Flutter, expanding the company's product portfolio and accelerating the development of client-facing applications.
- Enhanced an existing Flutter UI Kit, transforming it into a production-ready design system that improved usability and feature robustness across multiple projects.

PROJECTS

FileSphere

May 2024 - Aug 2024

Tech Stack: C, Socket Programming, Distributed Systems

- Built a robust distributed file system using C and socket programming, where multiple servers handled different file types (.c, .pdf, .txt), and a centralized server facilitated seamless client-server interactions, ensuring efficient file management.
- Designed and implemented socket-based communication between clients and servers to enable real-time file distribution across multiple servers, improving system performance and ensuring scalability in handling large datasets.

VibeCheck

Feb 2020 - Feb 2020

Tech Stack: Streamlit, Python, Git, HTML, CSS, JavaScript

- Developed an innovative news sentiment analysis tool as a hackathon project using Python and NLP techniques to extract insights from Twitter data fetched by making use of Twitter API.
- Engineered a web-based dashboard using Streamlit to visualize sentiment analysis results, enabling users to interactively explore and interpret news sentiment trends from social media data.

TECHNICAL SKILLS

- **Programming Languages:** Angular, Typescript, Node.js, C#, Java, Python, C, C++, Dart, Bash/Shell Scripting
- **Databases:** PostgreSQL, Microsoft SQL Server, MySQL, MongoDB, SQLite, Firebase DB
- **Development Tools:** Docker, Git, Jira, Github Actions, Jupyter Notebook, Postman, VSCode, Android Studio
- **Frameworks & Web Tech.:** Django, WPF, .NET Framework, DevExpress, Selenium, REST APIs
- **OS & Methodologies:** Linux, MacOS, Windows, Agile, Scrum, OOP
- **Soft Skills:** Adaptability, Analytical Thinking, Active Listening, Effective Communication, Team Collaboration

EDUCATION

Master of Applied Computing (Co-op stream)

Jan 2024 - Aug 2025

University of Windsor, Windsor, Ontario, Canada

- **Coursework:** Advanced Software Engineering, Advanced Computing Concepts, Advanced Database Topics, Advanced Systems Programming, Networking & Data Security, Internet Apps. & Dist. Systems, Marketing, Managing Employees

Bachelor of Computer Engineering

Jun 2018 - Jun 2022

Gujarat Technological University, Ahmedabad, India

- **Coursework:** Data Structures & Algorithms, Operating Systems, Compiler Design, Information Security, Advanced Java, DBMS, Computer Networks, Mobile Application Development, Web Programming, AI, IoT and applications

ACHIEVEMENTS

- Regional Finalist at Smart Gujarat for New India Hackathon, a 2-day Hackathon held in 2019-2020 in Gujarat, India.
- Successfully coordinated a technical quiz event at a national level Techfest held in 2020 in Gujarat, India.
